## Dear Emma

Planning consultation: Outline application for 43 dwellings including access, layout and scale, with all other matters reserved for future consideration

Location: Land Adjacent To Oakhurst Rise Cheltenham

Thank you for your consultation on the above dated 01 May 2020 which was received by Natural England on the same day. We are sorry for the delay replying.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

## **SUMMARY OF NATURAL ENGLAND'S ADVICE**

# NO OBJECTION - SUBJECT TO APPROPRIATE MITIGATION BEING SECURED

We consider that without appropriate mitigation the application would:

- have an adverse effect on the integrity of the Cotswold Beechwoods Special Area of Conservation <a href="https://designatedsites.naturalengland.org.uk/">https://designatedsites.naturalengland.org.uk/</a>.
- damage or destroy the interest features for which the Cotswolds and Commons and Beechwoods Site of Special Scientific Interest has been notified.

In order to mitigate these adverse effects and make the development acceptable, the following mitigation options should be secured:

Mitigation as set out in the Council's Habitats Regulations Assessment (HRA) Appropriate Assessment<sup>1</sup> must be secured.

We advise that an appropriate planning condition or obligation is attached to any planning permission to secure these measures.

Natural England's further advice on designated sites/landscapes and advice on other natural environment issues is set out below.

<sup>&</sup>lt;sup>1</sup> Appropriate Assessment report, 24.1.19 – Planning application ref 18/02171/OUT

### Further advice on mitigation

Natural England concludes from the submitted ecological appraisal and comments from the County Ecologist that the Council intends to rely on the Habitats Regulations Assessment (Including stage 2 - Appropriate Assessment) produced in respect of a previous planning application for the application site - reference 18/02171/OUT. A copy of the HRA from this previous application should be attached to the submitted documents posted on the Council's website.

Natural England notes that your authority, as competent authority, has undertaken an appropriate assessment of the proposal in accordance with Regulation 63 of the Conservation of Species and Habitats Regulations 2017 (as amended). Natural England is a statutory consultee on the appropriate assessment stage of the Habitats Regulations Assessment process.

Your appropriate assessment concludes that your authority is able to ascertain that the proposal will not result in adverse effects on the integrity of any of the sites in question. Having considered the assessment, and the measures proposed to mitigate for all identified adverse effects that could potentially occur as a result of the proposal, Natural England advises that we concur with the assessment conclusions, providing that all mitigation measures are appropriately secured in any permission given.

The Homeowner Information Pack should present information describing informal recreation opportunities in the following sequence:

- Public space on your doorstep
- A short drive by car or bus
- Further afield e.g. The Forest of Dean, the Severn Estuary

The proposed HIP leaflet for Hunts Grove, Quedgeley (produced by Crest Nicholson. Gloucester City Council and FPCR) provides a useful example.

# Sites of Special Scientific Interest (SSSI)

SSSIs with public access also exist closer to the application site than the Cotswold Beechwoods SAC. These include:

- Leckhampton Hill and Charlton Kings Common
- Crickley Hill & Barrow Wake
- Cotswold Commons and Beechwoods

In addition, Cleeve Common lies 4.0Km to the north-west.

Education and awareness raising measures designed to address the recreation theme in relation to the European Site described above should be designed to help avoid disturbance to wildlife and encourage awareness of these sites' sensitivities. Provided this holistic approach is taken we do not anticipate adverse effects on these SSSI's notified features.

Please note that if your authority is minded to grant planning permission contrary to the advice in this letter, you are required under Section 28I (6) of the Wildlife and Countryside Act 1981 (as amended) to notify Natural England of the permission, the terms on which it is proposed to grant it and how, if at all, your authority has taken account of Natural England's advice. You must also allow a further period of 21 days before the operation can commence.

### Other advice

#### Green infrastructure

Multi-functional green infrastructure can perform a range of functions including improved flood risk management, provision of accessible green space, climate change adaptation and biodiversity enhancement. Natural England would encourage the incorporation of GI into this development.

Adopted Joint Core Strategy policy INF3 and the JCS Councils' Green Infrastructure Strategy 2014 refer. Emerging Cheltenham Plan policy GI1 may also be relevant.

Consideration should be given to what opportunities exist to integrate green infrastructure delivery with measures that serve to offer alternative walking, running and cycling routes for new residents. Such measures may form part of a package that positively manages additional recreation pressure on local resources, as well as the SSSIs described above..

Further general advice on consideration of protected species and other natural environment issues is provided at Annex A.

Should the developer wish to discuss the detail of measures to mitigate the effects described above with Natural England, we recommend that they seek advice through our <u>Discretionary Advice Service</u>.

If you have any gueries relating to the advice in this letter please contact me on 07554 459452.

We would not expect to provide further advice on the discharge of planning conditions or obligations attached to any planning permission.

Should the proposal change, please consult us again.

Yours sincerely

Antony Muller Lead Adviser – West Midlands Planning for a Better Environment Team

# Annex A - Additional advice

Natural England offers the following additional advice:

## Landscape

Paragraph 170 of the National Planning Policy Framework (NPPF) highlights the need to protect and enhance valued landscapes through the planning system. This application may present opportunities to protect and enhance locally valued landscapes, including any local landscape designations. You may want to consider whether any local landscape features or characteristics (such as ponds, woodland or dry stone walls) could be incorporated into the development in order to respect and enhance local landscape character and distinctiveness, in line with any local landscape character assessments. Where the impacts of development are likely to be significant, a Landscape & Visual Impact Assessment should be provided with the proposal to inform decision making. We refer you to the Landscape Institute Guidelines for Landscape and Visual Impact Assessment for further guidance.

## Best and most versatile agricultural land and soils

Local planning authorities are responsible for ensuring that they have sufficient detailed agricultural land classification (ALC) information to apply NPPF policies (Paragraphs 170 and 171). This is the case regardless of whether the proposed development is sufficiently large to consult Natural England. Further information is contained in <a href="GOV.UK guidance">GOV.UK guidance</a> Agricultural Land Classification information is available on the <a href="Magic">Magic</a> website on the <a href="Data.Gov.uk">Data.Gov.uk</a> website. If you consider the proposal has significant implications for further loss of 'best and most versatile' agricultural land, we would be pleased to discuss the matter further.

Guidance on soil protection is available in the Defra <u>Construction Code of Practice for the Sustainable Use of Soils on Construction Sites</u>, and we recommend its use in the design and construction of development, including any planning conditions. Should the development proceed, we advise that the developer uses an appropriately experienced soil specialist to advise on, and supervise soil handling, including identifying when soils are dry enough to be handled and how to make the best use of soils on site.

#### **Protected Species**

Natural England has produced <u>standing advice</u><sup>2</sup> to help planning authorities understand the impact of particular developments on protected species. We advise you to refer to this advice. Natural England will only provide bespoke advice on protected species where they form part of a SSSI or in exceptional circumstances.

### Local sites and priority habitats and species

You should consider the impacts of the proposed development on any local wildlife or geodiversity sites, in line with paragraphs 171 and174 of the NPPF and any relevant development plan policy. There may also be opportunities to enhance local sites and improve their connectivity. Natural England does not hold locally specific information on local sites and recommends further information is obtained from appropriate bodies such as the local records centre, wildlife trust, geoconservation groups or recording societies.

Priority habitats and Species are of particular importance for nature conservation and included in the England Biodiversity List published under section 41 of the Natural Environment and Rural Communities Act 2006. Most priority habitats will be mapped either as Sites of Special Scientific Interest, on the Magic website or as Local Wildlife Sites. List of priority habitats and species can be found <a href="here">here</a>.

Natural England does not routinely hold species data, such data should be collected when impacts on priority habitats or species are considered likely. Consideration should also be given to the potential environmental value of brownfield sites, often found in urban areas and former industrial land, further information including links to the open mosaic habitats inventory can be found <a href="here">here</a>.

<sup>2</sup> https://www.gov.uk/protected-species-and-sites-how-to-review-planning-proposals

 $<sup>{}^3\</sup>underline{\text{http://webarchive.nationalarchives.gov.uk/20140711133551/http:/www.naturalengland.org.uk/ourwork/conservation/biodiversity/protectandmanage/habsandspeciesimportance.aspx}$ 

#### Ancient woodland, ancient and veteran trees

You should consider any impacts on ancient woodland and ancient and veteran trees in line with paragraph 175 of the NPPF. Natural England maintains the Ancient Woodland <u>Inventory</u> which can help identify ancient woodland. Natural England and the Forestry Commission have produced <u>standing advice</u> for planning authorities in relation to ancient woodland and ancient and veteran trees. It should be taken into account by planning authorities when determining relevant planning applications. Natural England will only provide bespoke advice on ancient woodland, ancient and veteran trees where they form part of a SSSI or in exceptional circumstances.

#### **Environmental enhancement**

Development provides opportunities to secure net gains for biodiversity and wider environmental gains, as outlined in the NPPF (paragraphs 8, 72, 102, 118, 170, 171, 174 and 175). We advise you to follow the mitigation hierarchy as set out in paragraph 175 of the NPPF and firstly consider what existing environmental features on and around the site can be retained or enhanced or what new features could be incorporated into the development proposal. Where onsite measures are not possible, you should consider off site measures. Opportunities for enhancement might include:

- Providing a new footpath through the new development to link into existing rights of way.
- Restoring a neglected hedgerow.
- Creating a new pond as an attractive feature on the site.
- Planting trees characteristic to the local area to make a positive contribution to the local landscape.
- Using native plants in landscaping schemes for better nectar and seed sources for bees and birds.
- Incorporating swift boxes or bat boxes into the design of new buildings.
- Designing lighting to encourage wildlife.
- Adding a green roof to new buildings.

You could also consider how the proposed development can contribute to the wider environment and help implement elements of any Landscape, Green Infrastructure or Biodiversity Strategy in place in your area. For example:

- Links to existing greenspace and/or opportunities to enhance and improve access.
- Identifying opportunities for new greenspace and managing existing (and new) public spaces to be more wildlife friendly (e.g. by sowing wild flower strips)
- Planting additional street trees.
- Identifying any improvements to the existing public right of way network or using the opportunity of new development to extend the network to create missing links.
- Restoring neglected environmental features (e.g. coppicing a prominent hedge that is in poor condition or clearing away an eyesore).

#### **Access and Recreation**

Natural England encourages any proposal to incorporate measures to help improve people's access to the natural environment. Measures such as reinstating existing footpaths together with the creation of new footpaths and bridleways should be considered. Links to other green networks and, where appropriate, urban fringe areas should also be explored to help promote the creation of wider green infrastructure. Relevant aspects of local authority green infrastructure strategies should be delivered where appropriate.

### Rights of Way, Access land, Coastal access and National Trails

Paragraphs 98 and 170 of the NPPF highlights the important of public rights of way and access. Development should consider potential impacts on access land, common land, rights of way, coastal access routes and coastal margin in the vicinity of the development and the scope to mitigate any adverse impacts. Consideration should also be given to the potential impacts on any nearby National Trails, including the England Coast Path. The National Trails website <a href="https://www.nationaltrail.co.uk">www.nationaltrail.co.uk</a> provides information including contact details for the National Trail Officer.

# **Biodiversity duty**

Your authority has a <u>duty</u> to have regard to conserving biodiversity as part of your decision making. Conserving biodiversity can also include restoration or enhancement to a population or habitat. Further information is available <u>here.</u>
