Planning application - UTT/21/2509/OP
RADWINTER ROAD, SAFFRON WALDEN

I object to this planning application on a number of issues.

Transport:- RADWINTER Road into Saffron Walden is regularly heavily congested with queues from Thaxted Road lights extending to the lights at Elizabeth Way. The road structure this side of the town cannot sustain such traffic flows already without 200+ homes being built with possibly 400+ cars on the roads.

Housing - this side of the town has already seen the bulk of development in recent years. No more should be allowed as to gain access to the railway or the M11 or any other main roads traffic has to travel through the town which has a restricted road network as befits the medieval town that it once was.

Infrastructure- schooling, doctors surgeries and dentists are already at capacity. More housing will only create additional pressure.
